## **Aeromagnetics / Radiometrics Program Initiated over Mt Schrader Crater Area**

Frontier Resources Ltd is pleased announce that a ~4,141 line kilometre aeromagnetic and radiometric geophysical program has been initiated at the Mt Schrader EL 1951 (Andewa Project) in Papua New Guinea.

Data is being obtained on a tight grid with 100m line spacings. A geochemical stream sediment sampling program will be undertaken when possible later this year.

Magnetite is known to be variably associated with the gold/copper mineralisation at Andewa (from drilling to date) and the magnetic information, in conjunction with other geological information, should provide enhanced vectoring towards possible gold/copper mineralisation in future exploration.

Newcrest Mining Ltd is earning a 60% equity in EL 1345 - Andewa and the encompassing EL 1951 - Mt Schrader, by sole funding A\$19.25 million in exploration before the end of 2015 (or they can withdraw after spending A\$2.5M). After Earn-In, Frontier can be deferred carried to completion of a Feasibility Study, repayable from 50% of mine profit. Newcrest may acquire an additional 12% equity in the project for a payment based on reserves and resources defined in the Feasibility & prior to the 'Decision to Mine'.

For additional information relating to Frontier Resources, please visit the Company's website at [www.frontierresources.com.au](http://www.frontierresources.com.au) or feel free to contact me.

### **FRONTIER RESOURCES LTD**

P.A. McNeil, M.Sc.  
CHAIRMAN / MANAGING DIRECTOR

The information in this report that relates to Exploration Results and Mineral Resources is based on information compiled by, or compiled under the supervision of Peter A. McNeil - Member of the Aust. Inst. of Geoscientists. Peter McNeil is the Managing Director of Frontier Resources, who consults to the Company. Peter McNeil has sufficient experience which is relevant to the type of mineralisation and type of deposit under consideration to qualify as Competent Person as defined in the 2004 Edition of the Australasian Code of Reporting Exploration Results, Mineral Resources and Ore Resources. Peter McNeil consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.
